DETAILED ACTION

1. The finality of the previous Office action is withdrawn. Prosecution is reopened.

Claim Rejections - 35 USC § 112

2. Claims 13-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure in the specification for the notch (claim 13) and the hole (claim 12) being combined in the same closure arrangement. This is a **new matter** rejection.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1,2,4,5, 7-10,13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Nightengale, Jr. (US 3,994,409).

Although applicant has provoked the provisions of 35 USC 112, 6th paragraph, the disclosure of Nightengale reads on the claims as follows: a closure element **15**, second annular portion **41**, third portion **43,37**, and storage means **61,63**. It can be seen in figure 4, that the tab portion **45** is stored between the skirt **41** and the neck **19** of the container.

Claims 13 and 14 are rejected as if they do not depend from claim 12 (see paragraph 1, above).

Allowable Subject Matter

5. Claims 3,6, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3781

6. Claims 15 and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st and/or 2nd paragraph(s), set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. In view of the new grounds of rejection, this Office action is made non-final.

8. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F.R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.

9. In order to reduce pendency and avoid potential delays, Group 3720/80 is encouraging FAXing of responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

10. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:
